

THE KENSINGTON
An Assisted Living Residence

WHITE PLAINS

COVID-19 Preparedness Care

**Because we care. Because we take our responsibilities seriously.
Because our residents are family...**

We are working continually to sustain a COVID-safe environment.

We are complying with the latest recommendations and requirements issued by the Centers for Disease Control and Prevention (CDC) and our local Department of Health.

Team Members:

- We monitor team members for fever and symptoms of illness twice per shift.
- A team member who exhibits one or more COVID symptoms leaves our community immediately upon discovery and may resume working on premises only if and when all CDC return-to-work guidelines are met.
- Team members practice social distancing.
- Team members are equipped with personal protective equipment (PPE), such as protective eyewear, masks, gowns and shoe covers.
- Team members wash hands and use hand sanitizer routinely throughout their shift.
- We provide team members with extra uniforms.

Residents:

- We continually monitor resident temperatures and oxygen levels throughout the day.
- Residents practice social distancing protocols while dining and during life enrichment activities.
- Residents wear masks when appropriate.
- We remind residents to wash and sanitize their hands throughout the day, and we provide assistance if needed.
- New residents quarantine for up to 14 days (*based upon testing results*).

Visitation:

- We have designated a single point of entry into our community for all who enter or make deliveries.
- Only essential personnel are currently allowed into our community.
- We adhere strictly to the Department of Health guidelines regarding visitation.
- We keep our residents and their families connected with Slack, video chat, phone calls, Eversound and FaceTime sessions.
- We facilitate on-site family visits, adhering to social distancing protocols.

Personal Protective Equipment (PPE):

- All team members and residents wear protective masks (except when eating or drinking).
- We stock and regularly monitor an inventory of protective masks, eyewear, gloves and gowns for all team members and residents.

Sanitation Measures:

- We use CDC-approved disinfectants, including Clorox 360, throughout our community, in high-traffic areas and in resident apartments.
- We use the Rubbermaid HYGEN™ cleaning system with Proctor and Gamble cleaning products that have been deemed effective against COVID.
- Team members retrieve deliveries outside our community and sanitize them before they distribute them.
- Only essential personnel are currently allowed into our community.

**Call us at (914) 390-0080 if you have questions or concerns
about the steps we're taking to halt the transmission of COVID-19.**
